Aspiring software engineer seeking new opportunities to learn and gain experience by doing.

Education

Georgia State University   Atlanta GA

B.S Computer Science   Graduation: May 2018

Technical Skills

-Javascript(ES6)	-HTML5/CSS3/SASS
-Node.js	-Java
-Git	-SQL
-Angular 4/2	-Bootstrap
-MongoDB	-PHP

Professional Experience

Vetek Consulting, Decatur Georgia – *Software Engineer Intern*   April 2018–Present

Angular4, HTML5, CSS/SASS

- Implements front end user interfaces on multiple projects, using HTML5/SASS to create usable pages that work on all devices
- Utilizes Angular4 to bind data and perform client side logic to streamline UI and hasten load times.
- Uses Git for version control

Projects

Census   February 2018–March 2018

Node.js, MongoDB, Bootstrap, DigitalOcean

- Full stack web application made to easily create polls.
- Developed using Node.js, MongoDB and Express.js, then hosted on DigitalOcean server
- Users can make polls and start sharing them with other people in less than a minute

Crypto Ticker   January 2018–February 2018

Coinmarketcap API, HTML, CSS, Javascript

- Chrome extension used to track the price of cryptocurrencies.
- Implemented using the Coinmarketcap API for accurate prices.
- Currently available on the chrome web store.

Personal Website   November 2017–January 2018

HTML, CSS, Javascript, JQuery, AWS S3/Route53

- Personal portfolio site developed from scratch without the aid of any frameworks.
- Implemented responsively to work on all devices.
- Deployed using AWS S3 and Route53.
- Visit at http://jeremysao.com (Also contains links to all other projects)
